

DEPARTMENT OF VETERANS AFFAIRS

VA Medical Center - Durham, North Carolina
Health Summary / Progress Note

Patient: REYES, DANA MARIE
DOB: 03/12/1988
Service era: OEF / Army

Date of visit: 2026-03-14
MRN: VA-DUR-004821
Provider: Dr. Elena Morales, MD - Primary Care

CHIEF COMPLAINT

Follow-up for bilateral tinnitus, hearing difficulty, and chronic low back pain. Veteran reports ringing in both ears since 2011 after blast exposure in Afghanistan.

ACTIVE PROBLEM LIST / DIAGNOSES

H93.19 Tinnitus, bilateral, subjective
H90.3 Sensorineural hearing loss, bilateral
M54.50 Low back pain, unspecified
F43.10 Post-traumatic stress disorder, unspecified (monitoring)

HISTORY OF PRESENT ILLNESS

Ms. Reyes is a 38-year-old Army veteran who served 2007-2013 with deployment to Afghanistan 2010-2011. She describes constant high-pitched ringing in both ears since an IED blast in April 2011. Symptoms worsen in quiet rooms and interfere with sleep. She also reports chronic lumbar pain worsened by prolonged standing; pain began during service and has persisted since separation. Currently treated in VA audiology and physical therapy.

TREATMENT / PLAN

- Continue audiology follow-up; hearing aids evaluated 2025-11-02
- Tinnitus retraining therapy referral active
- Naproxen PRN for back pain; PT twice weekly
- Return in 90 days or sooner if worsening

TREATING PROVIDERS

Dr. Elena Morales, MD - Primary Care, VA Durham
Dr. James Okonkwo, AuD - Audiology, VA Durham
